A photograph showing a row of potted plants, likely tomatoes, in a greenhouse. The plants are in the foreground, and a row of windows is visible in the background, letting in natural light.

- Greenhouse designed to keep trees such as oranges during the cold season; large windows and placed fruit trees planted in wooden boxes.
- They used as a 17th-century aristocratic social venue

- Built in 1851 as the venue for the first World's Fair in Hyde Park, London
- Designed by Joseph Paxton
- Inside, there were ponds, fountains, marble sculptures, and large numbers of plants.
- A number of events were held as a place for people to interact and an extraordinary festive space, including a flower expo, a dog co-association, a brass band, the Handel Festival, and fireworks.
